DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshimura et al. (6,237,205). Yoshimura discloses an installation for rolling a metal strip (14) comprising a reversing rolling mill (13), unwinding reels (20,11), winding reel (12) and a welder (5). The unwinding reel (20) is used as a strip store for a reverse pass as seen in figure 3 where a following strip (10) is welded to a trailing end portion of preceding strip (14) (column 4, lines 50-63). Yoshimura discloses (column 5, lines 48-51) welding following strips directly or via a dummy strip (23).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshimura et al. (6,237,205) in view of Nishi et al. (5,495,736). Yoshimura does not disclose a pickling line with strip store following the welder. Nishi teaches that it is known to provide a pickling means (5) having strip stores (4a,5d) following a welder (4).

Art Unit: 3725

It would have been obvious to one skilled in the art at the time of invention to provide Yoshimura with a pickling line and strip store as taught by Nishi in order to ensure continuous operation between the welder and pickling means.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
